WHAT IS THE FUSS ABOUT?

A wedding website is a personalised website that contains all the important information about your wedding day, such as date, time, location, dress code, gift idea, accommodation options, and more. It is designed to be accessible from desktop or mobile devices and is typically sent out via email or WhatsApp.

Guests can RSVP online, which makes it easier for you to manage your guest list. It is a great way to communicate a lot of information to guests in a convenient and organised manner, making it a popular choice among modern couples.
